

CATER-S

Excellent core cutter for cardboard cores

CATER-S main parameters:

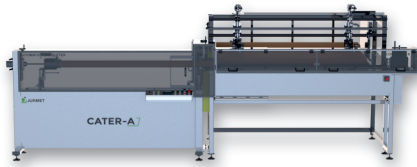

Max. parent core length	2000/3000mm (78.7" / 118.11")
Range of core inside diameter	1"- 10"
Max. wall thickness	18mm (0.7")
Min. slit length	10mm (0.4")

CATER-S the semi-automatic core cutter CATER-S is designed to cut cardboard cores into pieces of various lengths. This simple to use model guarantees dust free, efficient core cutting. The slitting section is designed so as it is not necessary to use manual force during slitting process because after pressing proper buttons the arm with a knife moves down and the knife cuts a core.

The core cutter is manufactured according to European safety standards (CE labeled).

MAIN FEATURES:

- Resistant cutting knife
- Solid design
- Easy settings
