MASTER3 Duplex slitter with separate unwind and rewind station

MASTER3 main parameters:

Web width	1000/2200mm (39.4" / 86.6")	Unwind roll diameter	1100/1500mm (43.3" / 72.8")
Min. web width	300mm (11.8")	Unwind roll weight	max. 2500kg (5512 lbs)
Min. slit width	25mm (1")	Rewind roll diameter	600/1000mm (23.6" / 39.4")
Speed	800m/min (2625 ft/min)	Core roll diameter	from 70mm (23.6") to 6"

Precision slitting with scalable automation

MASTER3 is a versatile slitter designed for efficient slitting of various flexible materials.

Its precise tension control system ensures stable web handling, while advanced automation - automatic knife setting, web guiding and job memory moduls - significantly boosts productivity.

Energy-saving systems help reduce operational costs and lower carbon footprint over time.

The modular construction of **MASTER3** also enables the integration of optional devices such as laser units, punching systems or inspection modules, making it adaptable for future production needs.

This universal model is available in both entry -level and fully automation version.

MAIN FEATURES:

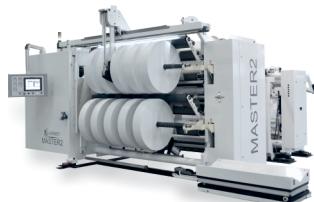

- Modular design with separate unwind and rewind station
- Eco-friendly built, with reduced overall energy consumption
- User-friendly 15" touchscreen panel with memory
- Design in line with modern industry trends
- Advanced automatic solutions
- Smart Converting features
- Automatic knife setting
- Industry 4.0 compatible
